

Use Cases:

1) Look Through Platform:

This use case allows the **Customer** to look through the website by just putting in the URL. There are some marketing pop-ups that will appear on the platform for the **Customer** and for the **Customer** to interact with the information, they would be taken to the login/sign up page.

Present Points

- 1) The customer can see the different items offered by the restaurant and they can see the different programs the restaurant offers

Absent Points

- 1) There are no pop ups yet.
